

I'm not robot!

sale or homage can also take place with more recent titles. You can also download public domain books through Project Gutenberg. The first thing you need to do with your new Kindle is to pass through the configuration and registration process. How to record your Kindle with an Amazon account Turn on your Kindle and select your linguero on your Kindle by pressing the power button at the bottom, at that point you will be asked to select a language. Touch what you want, so it's up to à € àvelop "Next. àvelop your region which will be presented with a list of regions based on the selected language. Touch one, then press "Next". Wait for the Kindle by restarting your Kindle now to restore yourself and you will see a progress bar at the top of the Standard Kindle background. Wait for it to end. Connect to a WiFi network your Kindle starts the backup, you will see a list of available wifi networks. Touch a wireless network it is necessary and follow the instructions to connect to the wifi. Access your Amazon account you need to enter your e-mail or telephone number, not the password to access your Amazon account and record your Kindle. If you don't have an Amazon account, tap "Account Create" and follow the instructions to set your account and add a payment method. Confirm your account that you have accessed, you will be brought to a welcome screen where you just have to touch "Next" as long as it is showing the correct name. Download Kindle Appnext is a screen that asks you for your phone number to send you a link to the Kindle app. This is quite useless as you can simply download it alone, so touch "no thanks if you don't want the link or type your phone number and tap" agent "if you want it. Wait for the Kindle to end up setting later that you have recorded your device, everything you have to do is that end up setting, what you will notice when thethe screen becomes populated. Although your new kindle is ready to be used, there are settings you may want to change from the default values before you start reading. we will pass through sections based on where you can find them on your kindle. the settings of the device before are the settings of the device. there is not too much to do here, but if you have a kindle supported by ads, you can disable the customization of ads (you will still see ads, only those tailored to you) and set a passcode, which is a must for security if you buy books on your kindle. you can also set the time zone if you need to change it after configuration. Account settings ahead are account settings, here you can connect your goodreads account, which syncs your kindle and your reading list and lets you post quotes and discussion threads from your e-reader. you can also create a family library, which allows you to share books with family members (another adult and up to four children). if you are preparing a regular kindle for a child - unlike a kids edition, you may want to create also amazon kids (previously kindle freetime). Enables a range of features and content for children, which you can know in our guide to amazon kids. You can also put restrictions on your device through parental control settings and filter ads with content that may be unsuitable for smaller children. "Enter into account settings tap the top entry in the list that says" your account." connect your account goodreads account information. enter parental controls settings in the menu of all settings, tap "pretentious controls". restrict access to features if you establish the kindle for a child, you may wantwhat they can do with it. Touch renovations and turn off access to the web browser, store, cloud and/or goodreads. setAmazon Kidsback in the parental control menu, tap "Amazon Kids", then "Start Amazon Kids" and follow the on-screen instructions. Set your family library to the first Settings menu, then tap "Household & Family Library". To add a new person, tap "Add a new person" and follow the instructions for adult accounts or children. Reading and display Settings Finally, we get to the settings that will most affect your reading experience on the kindle, namely display and reading settings. You can change the theme of your Kindle, character and size of the text you use, layout, how progress reading and time are displayed, as well as different other settings, as if you show highlights of the book you are reading. Unlike previous settings, you can access these options only from within a book. Since you're just setting up your Kindle, you can use the Kindle User Guide, which automatically comes to the library. Open a book from your library to access the display settings, you need to open a book from your library. Simply tap "Library" at the bottom of the screen, then tap any of your books, even the User Guide. Insert the Setp display anywhere at the top of the screen, then on the button that says "AA" on the bar at the top of the screen. Choose the first menu you will see is the one for themes. You can choose between "compact", "Standard" and "Large". Note that this setting overwrites the choices you make in the next two steps. Choose the font and the text sizenext, tap à€ œfont . There are 10 characters to choose from and the font size can be set on anything from 1 to 14. Depending on the character you choose, you can also bold li li eraloeqr ehcma iouy elatnozziro us otnematneiro1 atsopmi is eS, aenil alled arutaizaps al e inigram jed inoisnemid el, elatnozziro o elacitrev emoc otnematneiro1 eratsopmi elibissop "À", tuoyuLÀ—à €À otamaahc, ovisseccus unem li nituoyal li alogeR, otset alignment, Regular reading progress indicatedly, under the à € à € à € menu, it is presented with a random selection of settings. Set the reader's progress by touching the "reading progress" and choosing between the time left in the chapter, the time left in the book, the position in the book or page in the book. Note that this last option is available only for the books purchased from the Kindle shop. Enable the watch while reading if you want to be able to see the watch while reading, touch the option that says "Show watch while reading". Enable more information on your books, the next three settings allow you to activate if your Kindle highlights the names of the well-known books, show information on books when opened for the first time and if the popular salient points made by other users have been shown. Enable anything you like. Once the device has been recorded and you changed the settings to your liking, it's time to get the books on your new Kindle. It is possible to do it from any device à € "Finchà © has a web browser and can connect to the Kindle shop à €" but in this guide, we will do it from the Kindle. Look for the book you want to buy the Kindle house page, touch the search bar and type the name of a book or an author. If you want to use the series number of the book, which also works. Select the book you want to buy you will be shown a list of results. Select the book you want to buy. Buy and the boonce on the book page, touch the button that says "Buy for" and the price. Choose and check the payment method if you have not purchased a book through your Kindle, you will have to check your payment method or add a new credit card if you don't have a registered one. Here you are. Now you can return to the initial or to the library and you will see your new book there in seconds. With this, we reached the end of our short tutorial on the Kindle configuration process. Once registereddevice, tweaked the settings to your liking and bought books, there is nothing more to do but start reading. Although Amazon and Project Gutenberg offer some of the best stories ever told for free, it is still recommended that Avid readers consider a Unlimited Kindle subscription to obtain access to thousands of books on the same account on all Amazon devices. What did you think of our guide for the Kindle configuration? Have we helped you make your device work or was it all self-explosive? Let us know in the comments below. Thanks for reading. reading.
